

HIGH DENSITY BI-FILE

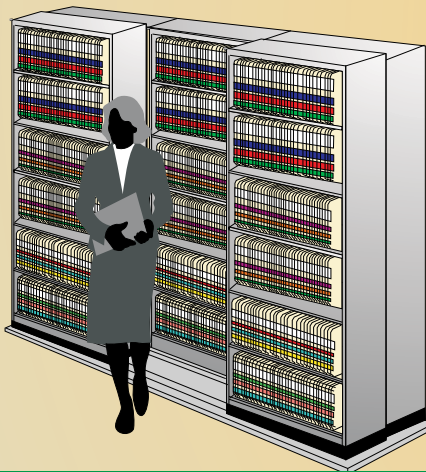

MOBILE MEDIA

WITH TENNSCO SHELVING

High Density Lateral with security shelf files

High Density Lateral with L&T four post

Modular Design: Track and Deck system are a combination of several components that allow flexibility in treatment. From the simplest track only to a combined configuration that will accommodate custom surface treatments, the look is determined by the end user requirements.

Case Hardened steel bearings: provide effortless side to side movement and long term service when match to the hardened steel track inserts.

Anti-tip: Creatively designed into the deck and track mechanism, practically invisible, to ensure the utmost safety and ease of operation.

Flexible Filing and Storage Solutions: Modular construction and Multi-Media filing and Storage units by Tennsco yield the most flexible configuration to address any media and security issue (HIPPA Compliance) confronted in a modern enterprise. It is simple to add to this system and reconfigured for any future application. No matter what the future requirements are the system can be adapted to address these dynamics.
